

How do I download an Audio Trail?

Simply right click the 'download the Audio Trail' link and select 'save target as.....'.

You will then be prompted to save the folder containing the Audio Trail files onto your computer. The files are contained in a 'zipped' folder, this simply saves you having to download each file in turn.

You will need to 'Extract' the files from the folder using Winzip or similar (most computers have it installed as standard), or your computer may do it for you.

Follow the prompts and once you have accessed the files you can download them to whatever media device you have available. The easiest way is to drag and drop them from your computer to your MP3 player, iPod or mobile phone.

If you don't already have an 'unzipping' programme on your computer, you can download one for free from the [Source Forge](#) website.

PLEASE NOTE: the Audio Trail is very large and may take a few minutes to download. We do not recommend trying to download the trail if you have a dial-up internet connection. If you have any problems please [contact us](#) and we will happily send you a copy on a cd.
